Birth to Three months old

Name: _____ Date: _____ Height: _____
in. Weight: _____ lbs _____ oz Head: _____ cm

Immunizations given today: up to date (bring shot record to every visit), please:

Simply Saline (please get this brand in the can - it has *no preservative*, others do):

For congestion / stuffy nose / allergy symptoms up to 4 times daily

Acetaminophen: 0.4 ml every 4-6 hours for fever >101° F (38.5° C) or pain

DO NOT USE IBUPROFEN IN CHILDREN LESS THAN 6 MONTHS OLD

Medicines prescribed:

Food:

- Breast milk or _____ formula 26 - 32 ounces per day, maximum 4 ounces per feeding, burp every 1/2 to 1 ounce
- Breasts will regulate the right amount of milk for your baby if your baby is breast fed.
- No juice or pureed foods until after 4 months old please (6 months for breast fed babies)

Tips:

- For formula fed babies, offer water after baby takes 4-5 ounces of formula
- Always hold your infant for feeding. Never prop a bottle
- Read labels, avoid foods containing olestra (Olean), aspartame (NutraSweet), nitrates/nitrites, MSG (monosodium glutamate), bisulfites, high fructose corn syrup, food colors (especially Red # 2 and TD&C Yellow #5 = tartrazine)

Suggested Minimum Daily Exercise for Parents

- Walk for at least one-half hour outside with your baby every day all at once as fast as you can -
- Goal: 2 miles or 24 blocks in 30-45 minutes. If the weather is bad, cover the baby appropriately and take a walk anyway!

Remember safety first - prevent accidents before they happen!

- Use seat belts, car seats
- Keep car seats in the car or on the ground and keep a hand on little ones unless they are on the floor or in their cribs.
- If your baby is sleeping with you, keep them on their belly on top of your body, not laying beside you on the bed.
- Be careful of hot bath water when your baby is near

Play / talk / read with your baby every day for at least 15 minutes three times a day.

- No TV in bedroom and restrict TV, VCR, DVD (electronic media) use until your baby is 2 years old.

Be aware of indoor air quality

- Avoid smoke of any kind, incense, sprays, air freshener, things with strong smells, carpet cleaner, scented candles, potpourri
- Dust from wall to wall carpets (remember that new carpets release formaldehyde) can be a problem
- Animal dander, feathers, and dust mites can trigger allergies.

For emergencies 24 hours/day, 7 days/week: Call 610-372-9222 - follow the instructions on the message - listen carefully, for changes

Use our telephone hour (7:30 - 8:30 am-7 days/week)

- Whenever your address or phone number changes
- For advice before you change your health insurance
- If you need an appointment for an ill child for that day
- To discuss concerns/problems that are not an emergency
